

Garden Guide

November

Feature Plant

Beans

Try your hand at growing a rewarding old bean this summer! The ultimate health food, beans in both the dwarf and the climbing variety love a position of full sun and prefer well drained soil in your vege patch.

Beans prefer warm weather and it's a great idea not to plant your crop until the danger of cool weather has passed.

For an abundant crop make sure to prepare your soil with compost and manure. Don't forget to mulch around your bean plants with Katek's very own Not Just Mulch - to keeps weeds under control and keep your soil moist!

Remember to keep up a regular watering regime once or twice a week and use a good dose of our Katek Super Growth All Purpose Liquid Fertilizer every 3 weeks! Your bean's will soon be healthy & green and you can expect to have a bountiful harvest in about 10 weeks from planting!

Did you Know?
The Green Bean has disease fighting tendencies! The lutien content found in all varieties is said to fight off macular degeneration and blindness!

When flowers bloom, so does hope!
Lady Bird Johnson

Feature Product

Super Grass Lawn Fertilizer

Ideal for Lawns & Gardens!

Our specialised composted poultry manure with synthetic high performance fertiliser provides excellent results on all types of nature and hybrid turf and lawns, including buffalo, couch, carpet grass! It's the secret to a healthy, lush green lawn that'll make the neighbours green with envy!

Portulaca	Salvia	Sunflower
Torenia	Verbena	

Feature Garden

the pulverised fertilizer because it seems to make its way through thick grassy mulch more quickly than pellets. The Katek team is a fixture at local garden shows, as both sponsors and stallholders, and Robyn enjoys finding new products such as the liquid fertiliser on sale at Gympie Garden Expo.

 Fertilize roses with a good quality rose food like Katek Rose & Flower.

Plant Day Lillies for their tough constitutions and generous blooming.

Prune fig trees to shape and improve fruit crop for the next season. Mulch around the base.

Plant passionfruit vines with a boost of Katek Blood & Bone and lots of mulch & water.

Feed Mangoes & Bananas with Katek Citrus & Fruit Fertilizer or an all round fertiliser like Super Growth.

Super Chicken's Top Tips
