

Garden Guide March

Feature Plant Passionfruit

A common feature in the home garden is a healthy, thriving passionfruit vine weaving along a fence!

This South American heritaged vine loves consistent nutrient feedings, blood and bone, compost, rich soil and plenty of sunshine. March is the ideal time to plant or trim your passionfruit vines.

Don't be concerned if you're just starting out, it can take 12-18 months for a newly planted vine to reach fruiting size, although some flowers may be produced in summer or early autumn.

Make sure to plant these lush climbers onto a fence, pergola, verandah or trellis that will support their size and weight when they are laden with fruit!

A regular watering regime and fertilizing with Katek's Super Booster organic fertilizer pellets every 6-8 weeks in spring & summer, plus plenty of mulch will guarantee plenty of flowers and result in a mass of fruit come harvest time!

Recycle Tip!

If you want to give your potted plants a boost, the next time you steam or boil veges, save the water for your potted plants and see how they thrive after a dose of vegetable soup!

Carnation	Cosmos	Dianthus
Geranium	Gerbera	Impatiens
Marigold	Pansy	Petunia
Rudebeckia	Sunflower	Verbena

Tropical

Ageratum	Amaranthus	Begonia
Crysanthemum	Coxscomb	Coleus
Cosmos	Dahlia	Dianthus
Gerbera	Kangaroo Paw	Marigold
Petunia	Portulaca	Salvia
Sunflower	Torenia	Verbena

-  Keep up a regular feeding for all your plants with Katek's Neptune Seaweed Concentrate every 1-3 weeks.
-  Get out in the garden and do some weeding. Clear the weeds away to allow more space for your plants to grow.
-  Re-fill pots with Katek Potting Mix, which feeds plants for up to 6 months.
-  Cut back cordylines to encourage branching lower down. Prunings can be used to strike new plants later on.
-  Prune all flowers and plants that have previously flowered, encouraging new growth for Spring!

Super Chicken's Top Tips

Sweet Corn	Tomato	Turnip

Subtropical

Artichokes	Asparagus	Basil
Capsicum	Coriander	Sweet Potato
Tomato	Turnip	Watermelon

Tropical

Basil	Ginger	Sweet Corn
Sweet Potato	Taro	

Feature Garden

Beryl Dan, Gympie, South East QLD

Beryl Dan has been a long time home gardener. She grows a variety of vegetables, citrus and fruit trees and loads of colourful flowers including stunning gerberas, hibiscus and roses.

Beryl has been using Katek Super Growth for a few months now "I feel it has been helping my garden, it's certainly given everything a boost, especially after the rain! Since putting it on my citrus and fruit trees, I've got double the amount of passionfruit flowers than I've ever had before and my passionfruit vine is taking over the fence.

I think the highlight is my hibiscus have grown at least 30cm in a very short time and have the most magnificent blooms".
