

Garden Guide

May

Feature Plant

Lavender

Representing purity, serenity and calmness - Lavender flowers and oils have their antiseptic, fragrance and sleep aid abilities!

This drought tolerant, beautiful shrub is a staple for any home garden! There are many different colours and varieties that produce shades of purple, pink and white flowers from winter through to spring.

Lavender doesn't need a lot of fertiliser. The best time to fertilise is at the end of Winter to help with Spring growth.

These tough shrubs are easy to grow and maintain, preferring a sunny position in the garden and don't require a lot of water to keep them happy & thriving!

Did you Know?

Eggshells make a wonderful addition to your gardens! Crush them down to a fine dust and turn into the soil. The calcium carbonate in the shells works as a natural fertiliser!

"A garden is always a series of losses set against a few triumphs, like life itself"

May Sarton

Feature Product

Lettuce	Onion	Peas
Shallots	Spinach	Turnip

Tropical

Beans	Beetroot	Cucumber
Lettuce	Squash	Zucchini

Feature Garden

*Alex Weeks,
Durack, Brisbane Region, QLD*

“My Bonsai trees started really well but after six months or so, I noticed a reduction in growth rates, and also a colour change”.

“When I mentioned this to Robin from Robin Godfrey Bonsai's in Oxley, he gave me some Katek Citrus and Fruit fertiliser. I just put a teaspoon on each tree and the result was amazing. He said that as well as the common nutrients you normally find in fertiliser it also had all of the trace elements my trees were probably lacking”.

“I couldn` t believe that such a small amount had such a dramatic effect!”
