

Garden Guide

June

Feature Plant

Cauliflower

Plant some delicious cauliflowers this winter! Quite easy to grow - these hearty veges will benefit from a good dose of Katek Super Growth All-Purpose Liquid Fertilizer every 3-4 weeks! These cool winter weather loving vegetables, love a sunny location in your vege patch - somewhere that receives about 6hrs per day! You can start them from seed or seedlings and then as they sprout, transplant them into a well composted, fertilised and moist area in your vege patch, topped up with Katek Not Just Mulch of course! A great companion plant for cauliflowers are any types of beans as the nitrogen produced by the beans as they grow will feed the green leaves of your cauliflowers! Ready to be harvested in 55 to 80 days, pick your cauliflowers when the heads are firm and tightly packed and measure about 20cm across! Cook up your harvest steamed, mashed or in a delicious cheesy cauliflower bake!

Did you Know?

If you haven't cleaned your fireplace, keep the ashes for spreading around the garden. The wood ash contains potassium which is a natural booster for fruiting and flowering!

"A garden is a great teacher. It teaches patience & careful watchfulness; it teaches industry & thrift; above all it teaches entire trust."

Gertrude Jekyll

Feature Product

Super Cal

LIQUID CLAY BREAKER

Fast Acting! 100% available Calcium!
More Effective than Gypsum!

What to Plant

Flowers

Cool Climate/Temperate

Alyssum	Aquilegia	Begonia
Cineraria	Cornflower	Delphinium
Dianthus	Foxglove	Geranium
Lobelia	Nemesia	Pansy
Polyanthus	Poppy	Snapdragon
Stock	Strawflower	Viola

Subtropical

Alyssum	Aster	Dianthus
Gazania	Impatiens	Marigold
Pansy	Viola	

Tropical

Ageratum	Aster	Balsam
Crysanthemum	Coxscomb	Coleus
Cosmos	Dahlia	Dianthus
Everlasting Daisy	Kangaroo Paw	Marigold
Petunia	Portulaca	Salvia
Sunflower	Torenia	Verbena

 Want to recycle your used cardboard coffee cups? Just rinse and plant your seeds or seedlings in the top. When they are transplanted to the garden, the cup will break down and form compost!

 Give potatoes and sweet potatoes a try this winter, just wait until they start to shoot and cover them with soil.

 Time to give your shrubs a tidy up with a good prune back!

 Indoor plants would love a feed of liquid or pelletised fertiliser.

Super Chicken's Top Tips

Vegetables/Herbs

Cool Climate/Temperate

Broccoli	Cabbage	Cauliflower
Mint	Pumpkin	Spinach
Sweet corn	Thyme	Tomato

Subtropical

Dill	Cabbage	Comfrey
Lettuce	Parsley	Sage
Spinach	Silverbeet	

Tropical

Artichoke	Beetroot	Celery
Lettuce	Silverbeet	Radish

Feature Garden

Neil Hansen Gympie, South East QLD

"The Plants went Wild with Growth!"

Neil was chasing something to quickly establish his new front garden, to hide the house tanks and shed on his property. "I decided on Katek Fertilizers because of their range of organic products. I used a few different products from their range, putting Super Growth pellets down when prepping the soil and then mulched the entire garden with Katek Not Just Mulch after planting. I also used Neptune Seaweed Concentrate liquid & Super Growth All-Purpose liquid every couple of weeks".

"I'm incredibly happy about the amazing results - the plants just went wild with growth! I would definitely recommend Katek products to anyone wanting to start new gardens or for your established gardens".
