

Garden Guide November

Feature Plant Spinach

Popeye's favourite, spinach the super green!

This dark green leafy vege is packed with loads of nutrients important for skin, hair and bone health. It is one of the most versatile leafy greens which can be eaten raw and cooked and blended into smoothies too!

The spinach takes its roots from ancient Persia and is still a widely popular vegetable today! The plant is easy to grow, preferring a sunny position with well drained soil and plenty of organic fertiliser and a steady watering regime.

The best time of the year to grow Spinach is from Spring to late Autumn. Remember to give your plants a dose of liquid seaweed fertiliser like Katek Neptune & Super Growth every couple of weeks and you'll have plenty of leafy greens to harvest in no time at all!

There is a handy trick to keep your cut flowers fresh for longer! Place a copper penny in the water with your flowers - it is a natural fungicide and bactericide! Your flowers will stay looking fresh & healthy!

When gardeners garden, it's not just the plants that grow, but the gardeners themselves.

Ken Druse

Feature Product Super Grass Lawn Fertilizer

Ideal for Lawns & Gardens!

Our specialised composted poultry manure with synthetic high performance fertiliser provides excellent results on all types of nature and hybrid turf and lawns, including buffalo, couch, carpet grass! It's the secret to a healthy, lush green lawn that'll make the neighbours green with envy!

Chives	Ginger	Lettuce
Mint	Radish	Zucchini

Tropical

Basil	Ginger	Mustard Greens
Rosella	Sweet Corn	Sweet Potato

Feature Farm

Ian Faulkner, Sugar Cane Grower, Mackay, QLD

Ian is a sugar cane grower in the Mackay Region. Apart from singing to it every night, Ian uses Katek's Super Booster as a side dress on his plant cane, experiencing great results.

Super Booster is a composted poultry manure product with added humates and microbes. The slow release pellets help build organic carbon levels in the soil which improves the soils structure and stimulates soil biology.
