

Garden Guide

January

Feature Plant

Capsicum

Red, Green, Yellow - Crisp & Crunchy deliciousness for your salad! With a history in America where they have been cultivated for thousands of years, in modern times capsicums are a common vege found all over the world. Also known as the Bell Pepper, these crunchy veges are easy to grow and are packed full of antioxidants and Vitamin C.

Capsicums enjoy a rich soil that has plenty of organic matter and compost or some Katek Super Booster pelletised fertiliser that will give them a kick along! You can grow these 60 to 80cm bushy shrubs from seed or seedlings throughout most of the year in the warmer states of Australia, preferring warm conditions for optimal harvest crop quantities.

A regular watering regime is necessary to get the plants established and a fortnightly dose of Neptune Seaweed liquid will keep your plants healthy.

Need a better nights rest?

Try placing gerbera daisies next to your bed, they omit oxygen and absorb carbon monoxide and toxins at night. They are especially helpful for those suffering from sleep apnea.

“No occupation is so delightful to me as the culture of the earth, and no culture comparable to that of the garden.”

Thomas Jefferson

Feature Product

Super Cal

Liquid Clay Breaker

Fast Acting Concentrate
100% Readily Available Calcium

Super Cal liquid breaks up clay, balances the soil and improves drainage!

1L of Super Cal is more effective than 20kg Gypsum!

Super Cal is formulated to improve soil structure for gardens and lawns as well as boosting plant health, root growth and the quality of fruits and vegetables!

What to Plant

Flowers

Cool Climate/Temperate

Ageratum	Alyssum	Cleome
Cyclamen	Iceland Poppy	Linaria
Malope	Marigold	Pansy
Schizanthus	Stock	Verbena
Viola	Vinca	Wallflower

Subtropical

Ageratum	Aster	Balsam
Celosia	Gomphrena	Impatiens
Marigold	Salvia	Sunflower
Torenia	Vinca	Zinnia

Tropical

Balsam	Celosia	Coxscomb
Coleus	Gomphrena	Impatiens
Marigold	Petunia	Salvia
Sunflower	Torenia	Vinca

-  Give all herbs, vegetables, shrubs and flowering plants a dose of Neptune Seaweed to keep them healthy from root to tip.
-  Use a higher cutting height when mowing your lawn to provide extra shade for the soil and roots and avoid moisture loss!
-  Trim back herbs to prevent fungal infections from humidity and keep the offcuts to dry and use in cooking and as home remedies.
-  Neaten up hedges and evergreen trees to encourage bushy growth.
-  Re-mulch your gardens after a good watering with Not Just Mulch about 7cm thick. This will keep the soil & plants hydrated.

Super Chicken's Top Tips

Vegetables/Herbs

Cool Climate/Temperate

Beetroot	Cabbage	Cucumber
Leek	Lettuce	Pumpkin
Radish	Silverbeet	

Subtropical

Artichoke	Beans	Eggplant
Lettuce	Silver Beet	Sweetcorn
Sweet Potato	Tomato	Watermelon

Tropical

Artichoke	Beetroot	Capsicum
Celery	Lettuce	Pumpkin
Shallots	Spring Onion	Tomato

Feature Garden

Kevin & Lyn Barnwell, Bli Bli, Queensland

Kevin & Lyn have had great success growing GIANT backyard Zucchinis at home. Not only has their crop been larger than normal but the flavours of their magnificent crop have been exceptional too.

Kevin noted that his trick to growing successfully is all to do with the preparation of the soil. He starts by putting lawn clippings on the garden bed from summer, then adds in lime and then a hefty quantity of Super Growth pellets to the soil and digs it all in.

Kevin usually lets the garden rest until Autumn and then adds another dose of Super Growth pellets and turns the soil over well. Lastly he plants in whatever crop he is growing, in this case Zucchini and waters it in well with Super Growth Liquid Fertilizer. He keeps up a regular watering regime and then 3 weeks later repeats the dose of Super Growth Liquid Fertilizer. The results speak for themselves!
