## February

### Feature Plant

## Peace Lily

**Where to plant:** Peace Lilies or Spathiphyllum are easy to grow in part sun to part shady locations in the garden or in pot plants in part shade. In the garden,

be sure to have well-draining soil with lots of added organic matter and if planting in pots, a good quality potting mix is best. Repotting in the springtime is best and if the plant becomes too big for the pot, break apart the bulbs and roots and divide into smaller plants.

Peace Lilies do not like colder climates and are best grown in tropical to subtropical locations or indoors in an area with filtered sunlight.

**Did you know?** Peace Lilies can also be grown in water alone. Just make sure to have the bulb and roots placed amongst small stones and keep the base of the plant above the water line to prevent rotting.

**Watering:** A consistent and regular watering regime is how to keep your Peace Lily thriving. Keep the soil moist, but not soaked. Do not let the plant dry out completely as you will then start to see brown and withered leaves.

**Fertilising:** If you are planting out your peace lilies into garden bed or into potting mix, we recommend prepping your soil with poultry manure pellets. A slow release variety like our Super Booster will break down into the soil over time. When planting out your Peace Lilies be sure to dunk the bulb and roots of the plant into a bucket of diluted Katek Neptune seaweed liquid and then plant out into the soil. We also recommend dosing your peace lilies with Neptune every 6 to 8 weeks, to keep the roots and plant growing strong.

### Quick Tip

When planting seeds never walk over moist soil because foot-prints cause serious compaction and restrict root growth.

*“Look deep in nature you will understand everything better”.*

## What to Plant

### Flowers

#### Cool Climate/Temperate

Ageratum	Alyssum	Cleome
Cyclamen	Iceland Poppy	Linaria
Malope	Marigold	Pansy
Schizanthus	Stock	Verbena
Viola	Vinca	Wallflower

#### Subtropical

Ageratum	Aster	Balsam
Celosia	Cockscomb	Coleus
Gomphrenan	Impatiens	Marigold
Salvia	Sunflower	Torenia
Vinca	Zinnia	

#### Tropical

Balsam	Celosia	Cockscomb
Coleus	Gomphrena	Marigold
Petunia	Salvia	Sunflower
Torenia	Vinca	

-  Don't forget that indoor plants need feeding too! Give your indoor plants a feed of Katek Neptune Seaweed concentrate and a little Super Booster fertiliser pellets!
-  Re-mulch all potted plants and trim back scraggly growth to encourage healthier, more shapely plant structures!
-  Try planting a mix of wildflowers or bee & butterfly friendly shrubs in your garden, you'll encourage more pollination & beneficial insects too!
-  Regular deep watering 1-2 times a week during the hotter months is more effective than a little bit every day.

## Super Chicken's Top Tips

### Vegetables/Herbs

#### Cool Climate/Temperate

Asian Greens	Broccoli	Cauliflower
Garlic	Leek	Lettuce
Spring Onions	Spinach	Silverbeet

#### Subtropical

Capsicum	Beetroot	Beans
Capsicum	Cabbage	Lettuce
Silver Beet	Sweetcorn	Tomato

#### Tropical

Broccoli	Cauliflower	Capsicum
Chillies	Cabbage	Lettuce

### Feature Product

# Super Grass Lawn Fertiliser

### The secret to a lush green lawn!

Organic based lawn food & soil improver.  
Excellent results on all types of natural and hybrid turf and lawns.

Steady, continuous feeding in both slow and quick release forms. Easy to apply.

Available in 3kg, 10kg buckets and 15 & 25kg bags.
